## KINETIC MAGNETIC \*\*DEMO ONLY

**Brand:** Kinetic  
**Product Code:** 183402-01  
**Availability:** In Stock

**Price: \$389.99**

### **Short Description** MAGNETIC TRAINER

### **Description**

Magnetic resistance at its finest. The Kinetic Magnetic bike trainer puts a wide range of quiet, smooth resistance at your fingertips with a nine-position indexed controller. Utilizing Eddy Current technology the Mag trainer offers progressive resistance up to 850 watts at 40 mph. The Magnetic's resistance curve offers a higher mid-range resistance than our fluid trainer models, making it a great match for low-g geared bikes like mountain and cross bikes. Our unique design runs cooler and quieter than other magnetic trainers for a more consistent and enjoyable ride.

- Kinetic trainers are compatible with virtually all bikes. Bikes with a rear thru-axle will require a [Kinetic Traxle](#) thru-axle adapter for use on any

trainer.

- Kinetic skewer included
