## P2 OVERENDZ

**Brand:** Specialized  
**Product Code:** 2140-0110  
**Availability:** In Stock

**Price: \$39.99**

### Short Description

BAR ENDS

### Description

Sharing the same technologies as our S-Works model, the P2 Overendz were designed in collaboration with mountain bike legend, Ned Overend. They're made of injection-molded nylon and finished with a soft rubber grip surface, so the P2 Overendz bar ends are sure to maximize comfort and control.

- Ergonomic design offers a wide top surface with a natural curve for comfortable hand positioning.
- Soft rubber grip surface for superior comfort and control.
- Injection molded nylon construction.

- 6061 aluminum perpendicular clamp maximizes forces and minimizes pressure on handlebar.
- Wide, low-profile clamp area offers a comfortable perch and multiple hand positions.
- NOTE: Specialized CNC Alloy Bar End Plugs (part number 2115-1030) are required with carbon bars.
