Description

Whether you've been riding trails for decades or you're just starting your XC journey, the Rockhopper Comp is here to take your rides to the next level. It starts with our new A1 Aluminum frame that has optimized tube shapes which save weight while dramatically improving aesthetics. To go along with these clean new lines, the new Rockhopper also has internal cable routing to further clean up the frame. Lastly, our Sport XC 29 geometry adjusts the reach, angles, and standover height to make for an improved fit across the size range. This is sure to keep you ripping and confident while heading both up and down the trail. This Rockhopper comes with a no-nonsense spec featuring a full Shimano drivetrain, dependable Shimano hydraulic disc brakes, grippy Ground Control tires that add traction over any trail, and an SR Suntour XCM 29 fork with our

custom Multi-Circuit damping that eliminates the "pogo" feel commonly associated with coil forks.
