## SPECIALIZED TAHOE MTB

**Brand:** Specialized  
**Product Code:** 61217-3444  
**Availability:** In Stock

**Price: \$129.99**

### Short Description

BLACK

### Description

The Tahoe Mountain Bike shoes were designed to deliver rugged and dependable off-road performance, especially if your rides see a good deal of hiking. To do so, they feature our SlipNot™ rubber outsole for added grip over roots and wet terrain. And to keep the shoes stiff enough for riding and flexible enough for walking, they also have our Lollipop™ inner plate that sits in a bed of comfy EVA padding. The fit is relaxed for everyday use, and the Body Geometry insoles provide ergonomically designed comfort and efficiency.

- Body Geometry sole construction and footbeds are ergonomically

designed and scientifically tested to boost power, increase efficiency, and reduce chance of injury by optimizing hip, knee, and foot alignment.

- SlipNot™ rubber compound developed in our tire lab optimizes shoe and pedal connection.
- Stiff Lollipop™ inner plate delivers high performance pedaling, and it sits in a bed of EVA foam to soften landings and maintain off-the-bike traction.
- Relaxed Fit for a balance of pedal feel and walking comfort.
- Lacelock™ elastic keeps laces out of the chainrings.
- Toe and heel overlays provide added abrasion resistance.
- Approximate weight: 350g (1/2 pair, Size 42)
