SPECIALIZED BG GEL

Brand: Specialized
Product Code: 67017-1000
Availability: In Stock

Price: \$59.99

Short Description

BLACK

Description

Our Body Geometry Gel gloves are all about comfort. They feature strategically placed gel pads throughout the palm to alleviate hand fatigue by relieving pressure on the ulnar nerve. This design also comes with the added benefit of minimizing hand numbness, as well as reducing many other negative effects that come as a result of road vibrations. Breathability has also been accounted for at the back of the hand, while a secure fit is ensured by a micro-width Velcro® closure.

- Gel pads are strategically located throughout the palm. Essentially, they

act cohesively as a bridge over the palm's recesses in order to relieve pressure on the ulnar nerve. Not only does the ample gel padding work to dampen vibrations that cause fatigue, but by protecting this point, the system also reduces numbness at the hand.

- Reinforced Micromatrix synthetic leather palm is supple and durable.
- Soft, absorbent Microwipe™ thumb for brushing away sweat.
- Micro-width Velcro® closure blends comfort with an unrestricted wrist movement.
